ANEXO I

8. Systems and Assessment Criteria

8.1 System for Assessment:

The subject will have several evaluation tests throughout the course, where the theoretical and/or practical contents taught in the course will be assessed (30%). Additionally, students will also have to complete an individual or group assignment on a specific program content, as well as carry out tasks assigned during classes (10%). The final exam at the end of the semester (60%) will assess all the theoretical and/or practical contents of the subject's program. The final grade for the subject will be calculated considering the weighting of each evaluation system.

Furthermore, the regulations also allow the possibility for students to opt for a single final evaluation, where they will be examined on all the subject content through a theoretical and/or practical exam. To choose this option, students must inform the responsible professor of the subject within the first two weeks of the course or within two weeks after enrolling if it occurs after the start of the subject. The communication should be done following the procedure indicated by the professor, and the receipt of the request must be explicitly acknowledged. This implies a clear waiver of continuous assessment, with no possibility for the student to switch evaluation systems.

The grading system used in the subject complies with the provisions of Article 5 of Royal Decree 1125/2003, of September 5, which establishes the European credit system and the grading system for official university degrees with national validity. The grades obtained by the student in each subject of the study plan will be graded according to the following numerical scale from 0 to 10, with one decimal place, and may be accompanied by the corresponding qualitative grade:

- 0.0 to 4.9: Fail (F)
- 5.0 to 6.9: Pass (P)
- 7.0 to 8.9: Good (G)
- 9.0 to 10: Outstanding (O)

The distinction "Honors" may be awarded to students who have obtained a grade equal to or higher than 9.0. The number of students receiving this distinction cannot exceed 5% of the enrolled students in a subject during the academic year, unless the number of enrolled students is less than 20, in which case only one "Honors" distinction may be awarded. If the faculty decides to grant this distinction and the number of candidates exceeds the allowed maximum, it will be awarded to the student(s) with the highest final grade (provided it is above 9). In case of a tie in the final grade, an additional test will be administered.

8.2 Assessment Criteria and Marks:

8.2.1 Examinations Convocatory I

Ordinary calls I and II

The subject will have several evaluation tests during the course where the theoretical and practical contents taught in it will be evaluated (30%). Likewise, they will also have to carry out some task on some content of the program (10%). The exam that will take place at the end of the semester (60%) will evaluate all the theoretical and practical contents of the subject program. The final grade for the subject will be calculated considering the weights of each of the evaluation systems and it will be necessary to achieve a minimum grade of 3.5 (out of 10) in the final exam so that the average is calculated with the rest of the tests.

8.2.2 Examinations Convocatory II

The student will be examined on all the content of the subject through a theoretical and/or practical exam. It will be necessary to obtain a minimum score of 5 to pass the subject. The grading system used in the course complies with the provisions of Article 5 of Royal Decree 1125/2003, dated September 5, which establishes the European credit system and the grading system for official university degrees with national validity. The student's results in each subject of the study plan will be graded according to the following numerical scale from 0 to 10, with one decimal place, and may be accompanied by the corresponding qualitative grade:

1. 0.0 to 4.9: Fail (F)
2. 5.0 to 6.9: Pass (P)
3. 7.0 to 8.9: Good (G)
4. 9.0 to 10: Outstanding (O)

The distinction "Honors" may be awarded to students who have obtained a grade equal to or higher than 9.0. The number of students receiving this distinction cannot exceed 5% of the enrolled students in a subject during the academic year, unless the number of enrolled students is less than 20, in which case only one "Honors" distinction may be awarded. If the faculty decides to grant this distinction and the number of candidates exceeds the allowed maximum, it will be awarded to the student(s) with the highest final grade (provided it is above 9). In case of a tie in the final grade, an additional test will be administered.

ANEXO I

8.2.3 Examinations Convocatory III

The student will be examined on all the content of the subject through a theoretical and/or practical exam. It will be necessary to obtain a minimum score of 5 to pass the subject. The grading system used in the course complies with the provisions of Article 5 of Royal Decree 1125/2003, dated September 5, which establishes the European credit system and the grading system for official university degrees with national validity. The student's results in each subject of the study plan will be graded according to the following numerical scale from 0 to 10, with one decimal place, and may be accompanied by the corresponding qualitative grade:

1. 0.0 to 4.9: Fail (F)
2. 5.0 to 6.9: Pass (P)
3. 7.0 to 8.9: Good (G)
4. 9.0 to 10: Outstanding (O)

The distinction "Honors" may be awarded to students who have obtained a grade equal to or higher than 9.0. The number of students receiving this distinction cannot exceed 5% of the enrolled students in a subject during the academic year, unless the number of enrolled students is less than 20, in which case only one "Honors" distinction may be awarded. If the faculty decides to grant this distinction and the number of candidates exceeds the allowed maximum, it will be awarded to the student(s) with the highest final grade (provided it is above 9). In case of a tie in the final grade, an additional test will be administered. final grade (provided it is greater than 9). In the case of equality in the final grade, an additional test will be considered.

ANEXO I

8.2.4 Extraordinary Convocatory

The student will be examined on all the content of the subject through a theoretical and/or practical exam. It will be necessary to obtain a minimum score of 5 to pass the subject. The grading system used in the course complies with the provisions of Article 5 of Royal Decree 1125/2003, dated September 5, which establishes the European credit system and the grading system for official university degrees with national validity. The student's results in each subject of the study plan will be graded according to the following numerical scale from 0 to 10, with one decimal place, and may be accompanied by the corresponding qualitative grade:

1. 0.0 to 4.9: Fail (F)
2. 5.0 to 6.9: Pass (P)
3. 7.0 to 8.9: Good (G)
4. 9.0 to 10: Outstanding (O)

The distinction "Honors" may be awarded to students who have obtained a grade equal to or higher than 9.0. The number of students receiving this distinction cannot exceed 5% of the enrolled students in a subject during the academic year, unless the number of enrolled students is less than 20, in which case only one "Honors" distinction may be awarded. If the faculty decides to grant this distinction and the number of candidates exceeds the allowed maximum, it will be awarded to the student(s) with the highest final grade (provided it is above 9). In case of a tie in the final grade, an additional test will be administered. final grade (provided it is greater than 9). In the case of equality in the final grade, an additional test will be considered.

8.3 Single Final Evaluation:

The student will be examined on all the content of the subject through a theoretical and/or practical exam. It will be necessary to obtain a minimum score of 5 to pass the subject. The grading system used in the course complies with the provisions of Article 5 of Royal Decree 1125/2003, dated September 5, which establishes the European credit system and the grading system for official university degrees with national validity. The student's results in each subject of the study plan will be graded according to the following numerical scale from 0 to 10, with one decimal place, and may be accompanied by the corresponding qualitative grade:

1. 0.0 to 4.9: Fail (F)
2. 5.0 to 6.9: Pass (P)
3. 7.0 to 8.9: Good (G)
4. 9.0 to 10: Outstanding (O)

The distinction "Honors" may be awarded to students who have obtained a grade equal to or higher than 9.0. The number of students receiving this distinction cannot exceed 5% of the enrolled students in a subject during the academic year, unless the number of enrolled students is less than 20, in which case only one "Honors" distinction may be awarded. If the faculty decides to grant this distinction and the number of candidates exceeds the allowed maximum, it will be awarded to the student(s) with the highest final grade (provided it is above 9). In case of a tie in the final grade, an additional test will be administered. final grade (provided it is greater than 9). In the case of equality in the final grade, an additional test will be considered.
