| No changes in the program. | | | |
| Adecuación actividades formativas y metodologías docentes | | | |
| <p>Face-to-face theory classes have been taught virtually, with the same schedule established for face-to-face teaching, using Zoom.</p> <p>Field trips have been replaced by a critical study of two research papers that describe the main observations that were intended to be shown in the field, as well as the preparation by the student of a report that includes the most important aspects and the main conclusions of the two field areas included in the research papers (Minas de Sao Domingos and Tinto-Odiel basins).</p> | | | |
| Adaptación de sistemas de evaluación | | | |
| <p>En la ficha de la asignatura en la modalidad presencial, se indicaba:</p> <p>Evaluación continua</p> <p>The evaluation will consist of two phases: 1) a theory exam that will represent 70% of the score, and 2) the score on the field reports and the training activities, that will account for 30% of the course grade. In this latter case, the attendance, the attitude of the student and their active participation in class, the reports of the fieldwork, and the quality of the training activities carried out will be evaluated. The score obtained in this section in this session (convocatoria ordinaria I) will be maintained for next session (convocatoria ordinaria II). If the student does not pass this section due to lack of attendance to class and/or lack of delivery of scheduled assignments and tasks, he/she will have an exam on the contents explained in the field practices and the rest of the programmed activities.</p> <p>Evaluación única final</p> <p>The single final evaluation will consist of a written test in which 70% of the score will correspond to questions related to the contents of the theory program and the remaining 30% to the contents explained in the fieldwork and the rest of scheduled activities.</p> <p>Esto se sustituye en docencia online por:</p> <p>Evaluación continua</p> <p>The evaluation will consist of three items:</p> <ol style="list-style-type: none">1) Theoretical exam (multiple choice test) that will account for 40% of the grade. After each lesson the student will answer a multiple choice test covering the most important issues discusses in the <i>online</i> classes.2) Oral defense by videoconference of a presentation (training activities) of a mineral commodity chosen by the student, which will represent 30% of the grade.3) A written critical study of two research papers in which the main observations that were intended to be shown in the field are collected, as well as the most important aspects and the main conclusions of the two field areas included in the research papers, which will represent 30% of the grade. | | | |

| SISTEMA DE EVALUACIÓN | PORCENTAJE (%) |
|--|-----------------------|
| Presentación/defensa oral por videoconferencia | 30 |
| Prueba objetiva (tipo test) | 40 |
| Documentos/Trabajos propios (individuales o en grupo) | 30 |

Evaluación única final

The final single evaluation will consist of an oral examination by videoconference of the theoretical program, which will account for 40% of the grade, and a multiple-choice test on the contents of the training activities and the two field areas studied , which will account for 60% of the grade.

| SISTEMA DE EVALUACIÓN | PORCENTAJE (%) |
|--|-----------------------|
| Examen oral por video-audio conferencia | 40 |
| Prueba objetiva (tipo test) | 60 |
